Stitches Illustrated

Stitches and Abbreviations Explained

hs — Hemstitched.

ch — Chainstitch.

With a loop on needle pick thread up, and draw through.

p — Picot.

A given number of chain, joined together.

dc — Double crochet.

With loop on needle, insert hook and draw thread through; thread over needle and draw through the two loops on needle.

t — Treble.

With loop on needle, thread over needle—insert needle, and pull thread through; thread over needle, pull through two loops; thread over needle and pull through remaining two loops.

lt — Long treble.

With loop on needle, thread over needle twice; insert needle, pull thread through; thread over needle and pull through two loops; thread over needle and pull through two loops; thread over needle and pull through remaining two loops.

When following instructions you read—"holding last stitch on needle," pull thread through two loops twice only, leaving two loops on needle.

"Slip thread through."—Insert needle, pull thread through work and loop on needle, repeat until you get to place required.

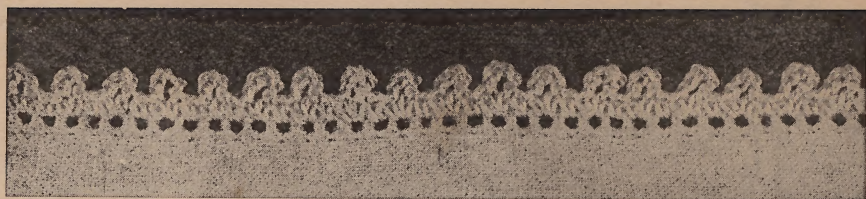

Important

THESE edges were crocheted in Coats' Mercer-Crochet cotton, size 50, and it was necessary to do two double crochet in every other hemstitched space. For two tone edges use Coats' Mercer-Crochet cotton in color. Should finer cotton be used it would be necessary to do two double crochet in every hemstitched space. When crocheting handkerchiefs, use Coats' Mercer-Crochet, size 150, for white, and Coats' Super Sheen, for colors.

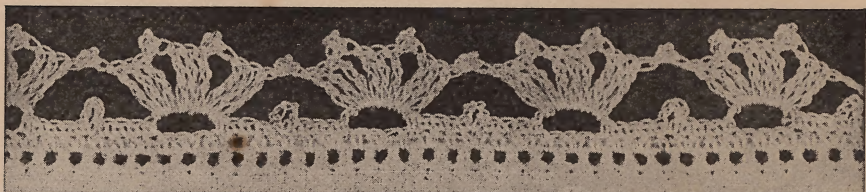

Where a row commences with treble, make three chain to take the place of the first treble.

Many of the larger edges would look nice if worked with Sylvan Crochet silk on babies' shawls.

These edges have mainly been designed to crochet round linen, but the above edge and several of the wider ones at the end of this book will be found suitable as an edge for Babies' Shawls crocheted with wool or silk.

The narrower edges are excellent for baby-wear. They also look beautiful crocheted in fine cotton round handkerchiefs, and if these have 1/16th inch hem the first row of double crochet may be omitted.

An effective finish to Centres, etc., embroidered in colour is made when the edges Nos. 9, 10, 64, 66, 95 are crocheted in two tones.

This lustrous thread is as smooth as silk to the touch, retains indefinitely its freshness and beauty, never loses its original colour, nor its supple, soft texture.

For crocheting edges on tray mats, table centres, guest towels or luncheon mats, it is the popular and ideal thread, and is admirable for bolder embroidery work.

It comes in a range of delicately appealing fast colours as well as in white.

PATONS BEEHIVE FINGERING
is given a
SHRINK-RESIST FINISH
known as 'Patonised'

The wool that can be washed repeatedly without shrinking and — most important! — will retain its original soft fullness and woolly texture.

The "PATONISED" Shrink-Resist Finish is not something new and untried, but is the result of 15 years of experience.
